evolution wireless G4

With 2018 marking the 20th anniversary of evolution, Sennheiser is proud to present the long-awaited **evolution wireless G4**.

Launched in 1998, Sennheiser's evolution line has become an industry standard all over the world, serving as its most successful microphone series to date. evolution Wireless has become a go-to solution for a wide variety of applications including live performances, ENG work, business communications and more.

With over 70 years of creating ground-breaking products, Sennheiser continues to lead the industry with its innovations and visions for the future of audio. evolution Wireless G4 demonstrates Sennheiser's dedication to creating the ultimate audio experience through excellent sound quality and user-centric design. G4 also marks Sennheiser's commitment to evolving with both its current customers and those of the coming generations.

evolution wireless G4: Overview

evolution Wireless G4 retains all of G3's best features while simultaneously providing many system improvements.

More Power

evolution Wireless G4 features more power than its predecessor. The 300, 500 and IEM series offer increased RF power, up to 50 mW, for greater transmission range. The portable Broadcast & Film sets benefit from 8 hours of battery power.

More Bandwidth

G4 exceeds expectations with increased switching bandwidth of up to 88 MHz in the 300 and 500 series.

More Flexibility

G4 offers full flexibility for a wide range of possible applications: live sound, in-ear monitoring, portable solutions for ENG and professional film productions. It is mobile, always on air, and evolves with users and their demands.

Quicker Setup

G4's 100 series systems can be daisy chained for fast, coordinated setup via a new linking function. G4's intuitive LCD and OLED displays make the lives of engineers easier in any environment.

SENNHEISER

Product launch

evolution wireless G4

Full Integration

G4 keeps you connected. For mobile PA applications, the receivers slot directly into the LSP 500 wireless loudspeaker. Integrators adore G4's versatility when it comes to workflows and control software such as the WSM (Wireless Systems Manager) and the Sennheiser Control Cockpit.

Full Mobility

When it comes to applications in hospitality, education and events, G4 is your mobile solution that fits into any room and perfectly integrates into existing workflows. Documentary filmmakers and video journalists know that G4 fits into any bag and provides powerful speech intelligibility for their interviews or reports.

For years, evolution wireless G3 has been one of the best-selling wireless systems in the market. evolution wireless G4 takes this legacy one step further with more power, features and flexibility.

- Fully compatible with existing evolution wireless equipment from G1 to G3
- Unparalleled performance and feature set
- Many user-inspired improvements: wider switching bandwidth and higher output power of up to 50 mW for the 300 and 500 series
- Great audio quality due to a wide range of professional microphone capsules, clip-on mics and headsets

evolution wireless G4: What's New?

In addition to a sleek new design, evolution Wireless G4 features many system improvements.

Product launch

evolution wireless G4

G4 100 Series

Fully compatible with all previous series.

New Multi-Channel Setup Capabilities

Up to 12 systems can be daisy-chained with an Easy Setup function (cable included).

Improved User Interface

High-contrast LCD display, blue sync LED, dedicated Escape button.

Lighter Weight

New: aluminum housing for SKM handheld transmitters.

Added Functionality

Programmable mute switch added to SKM handheld transmitters.

More In The Box

Rackmount now included with every 100 series set.

SENNHEISER

Product launch

evolution wireless G4

G4 300 Series

Fully compatible with all previous series.

More Bandwidth

Switching bandwidth expanded. Now up to 88 MHz and 32 channels.

More Power

Higher RF output power of up to 50 mW, selectable in three steps (10/30/50).

More Protection

Bodypacks with increased protection from humidity and water splashes.

Improved User Interface

Convenient jog wheel, OLED display, white text on black background, automatic dimming, blue sync LED, red warning LED, dedicated Escape button.

Brand New Sets

New Base Sets allow use of existing capsules and mics: Base SK, Base SKM and Base Combo (with SK and SKM).

SENNHEISER

Product launch

evolution wireless G4

G4 500 Series

Fully compatible with all previous series.

More Bandwidth

Switching bandwidth expanded. Now up to 88 MHz and 32 channels.

More Power

Higher RF output power of up to 50 mW, selectable in three steps (10/30/50).

More Protection

Bodypacks and portable camera receivers with increased protection from humidity and water splashes.

Improved User Interface

Convenient jog wheel, OLED display, white text on black background, automatic dimming, blue sync LED, red warning LED, dedicated Escape button.

Brand New ENG Pro Sets and Products

In addition to the 100 series camera systems, a brand new range of 500 series systems cater to film and video needs: the PRO lavalier mic set (includes MKE 2), the PRO Film Combo Set (with MKE 2 and phantom-powered SKP), and the PRO Boom Combo Set (phantom-powered SKP).

Product launch

evolution wireless G4

G4 IEM Series

Fully compatible with all previous series.

More Power

Higher RF output power of up to 50 mW.

More Protection

Bodypacks with increased protection from humidity and water splashes.

Improved User Interface

Convenient jog wheel, OLED display, white text on black background, automatic dimming, blue sync LED, red warning LED, dedicated Escape button.
